Recent developments

On January 29, 2025, the Company announced that it amended the exercise price of 7,143,999 common share purchase warrants that were issued pursuant to a private placement of units that closed on July 6, 2023. Each warrant was previously exercisable to purchase one common share of the Company at a price of \$0.75 for 24 months from the date of issuance. Following the amendment, each warrant will have an exercise price of \$0.30 and will be subject to an accelerated expiry provision such that, if the closing share price on the TSXV exceeds \$0.375 for any 10 consecutive trading days during the unexpired term of the warrants, the exercise date will be accelerated to 30 calendar days.

On April 10, 2025, the Company signed a three-year option agreement with arm's length private vendors through its wholly owned subsidiary Epica Gold Inc. to acquire a 100% interest in a strategically located 21-hectare inholding within the Munro-Croesus Gold Project.

On April 10, 2025, the Company announced the extension of drill hole MC24-163 onto a newly optioned inholding property at the Argus North Zone, which significantly expanded and improved upon the previously reported intersection (48.1 m grading 1.9 g/t Au in drill hole MC24-163; see Company news release dated September 10, 2024). The results defined a broad, continuous zone of strong gold mineralization, returning 69.6 m grading 3.4 g/t Au, including a high-grade subzone of 9.5 m grading 13.9 g/t Au.

On April 24, 2025, the Company announced the acceleration of the expiry of outstanding common share purchase warrants of the Company that were originally issued July 6, 2023 and amended January 29, 2025. Out of the original 7,143,999 in total warrants issued at an amended purchase price of \$0.30, over 6,000,000 warrants had been exercised as of May 5, 2025 for total proceeds of \$1,809,000, leaving 1,114,000 warrants still outstanding. The remaining warrants now have an expiry date and time of 5:00 p.m. (Toronto time) on May 24, 2025. Any warrants remaining unexercised after the accelerated expiry date will expire and be of no force and effect.

On May 22, 2025, the Company closed its \$8,038,000 "bought deal" private placement of (a) 5,000,000 common shares of the Company that qualify as "flow-through shares" (within the meaning of subsection 66(15) of the Tax Act (the "**Tranche 1 FT Shares**") at a price of \$1.00 per Tranche 1 FT Share for aggregate gross proceeds of \$5,000,000, and (b) 3,100,000 common shares of the Company that qualify as "flow-through shares" (the "**Tranche 2 FT Shares**") at a price of \$0.98 per Tranche 2 FT Share for aggregate gross proceeds of \$3,038,000. The offering was led by Cormark, together with Agentic Capital Markets Limited Partnership on behalf of a syndicate of underwriters. The underwriters received a cash commission equal to 6% of the gross proceeds of the offering, being \$482,280.

On May 29, 2025, the Company closed the first tranche of its previously announced non-brokered private placement with a strategic investor of 3,490,343 common shares of the Company at a price of \$0.85 per common share for aggregate gross proceeds of approximately \$3 million.

On June 6, 2025, the Company closed the second and final tranche of its previously announced non-brokered private placement. Pursuant to the second tranche of the private placement, the Company issued 1,709,657 common shares that qualify as “flow-through shares” (within the meaning of subsection 66(15) of the Tax Act) at a price of \$1.19 per flow-through common share for aggregate gross proceeds of approximately \$2.03 million. Following the closing of this final tranche, the Company raised a total of \$13.04 million since May 2025.

On June 12, 2025, the Company announced the first drill results from the Phase 1 drill program at the Argus North Zone, which returned broad intervals of strong gold mineralization and established continuity of over 100 vertical meters. Results were reported for two (2) new step-out holes and the extension of two (2) existing holes, on the ‘discovery cross-section’ and included the following highlights: 91.0 m grading 1.8 g/t Au including 32.0 m grading 4.0 g/t Au and 17.0 m grading 5.3 g/t Au in drill hole MC25-168, a 50 m up-dip step-out from discovery hole MC24-163; and 59.7 m grading 2.5 g/t Au including 18.7 m grading 5.2 g/t Au in drill hole MC25-171, a 30 m up-dip step-out from hole MC25-168.

On July 23, 2025, the Company announced the results from five (5) step-out drill holes completed on a cross-section located 50 m east of the Argus North discovery cross-section with drill hole MC24-163. The results demonstrate excellent continuity of wide intervals of strong gold mineralization now defined over 200 m vertically and extending right to surface. Significant intercepts include: 52.2 m grading 2.2 g/t Au including 5.2 m of 5.1 g/t Au, and a second deeper intersection of 61.3 m of 1.5 g/t Au including 6.6 m grading 4.2 g/t Au, in drill hole MC25-178 for a total cumulative width of 113.5 m of mineralization; 66.8 m grading 1.4 g/t Au including 4.0 m of 6.6 g/t Au, in drill hole MC25-179, a 50 m up-dip step-out from drill hole MC25-178; and 50.4 m grading 1.9 g/t Au starting at 6.1 m downhole (approximately 4 m vertically from surface), including 4.0 m of 5.9 g/t Au, in drill hole MC25-180, a 50 m up-dip step-out from drill hole MC25-179.

On August 5, 2025, the Company received approval of its Class 1 Notification (Q2025_0140) from the Mayo Mining District, Yukon Government, authorizing surface exploration and up to 5,000 m of diamond drilling from 10 sites across the King Tut Gold Project.

Material facts

There are no material facts about the securities being distributed that have not been disclosed in this offering document or in any other document filed by the Company in the 12 months preceding the date of this offering document and the date the Company’s most recent audited annual financial statements were filed.

What are the business objectives that we expect to accomplish using the available funds?

The Company’s primary objective is to explore and develop the Munro-Croesus Project and the Company intends to use an amount equal to the gross proceeds of the sale of FT Shares to incur Qualifying Expenditures related to the Munro-Croesus Project on or before December 31, 2026.

The Company is currently undertaking a 25,000 m drilling program in Timmins, Ontario, with a focus on the Munro-Croesus Project. The Company intends to increase the drill program and complete the program within the next 12 months on various targets at the Munro-Croesus Project.

The Company has all the required exploration permits and agreements in place to undertake the program. Following the successful results to date, the Company plans to use the funds to increase its drill program in order to expand its focus area of drilling across the Munro-Croesus Project and the other two earlier-stage exploration projects located in Timmins, Ontario.

As noted below, the Company has allocated an aggregate of \$17,000,000 to the exploration program at the Munro-Croesus Project. The Company anticipates that such funds, together with the Company’s current working capital, will be sufficient to complete these proposed exploration activities.

Once further drilling and exploration work is completed on the Munro-Croesus Project, the Company will evaluate the results and determine next steps with respect to its future exploration and developments activities.

PART 3 USE OF AVAILABLE FUNDS

What will our available funds be upon the closing of the Offering?

If the Option is not exercised, the expected total available funds to the Company following completion of the Offering is estimated to be \$22,816,551. If the Option is fully exercised, the expected total available funds to the Company following completion of the Offering is estimated to be \$24,646,551.

		Assuming no exercise of the Option	Assuming full exercise of the Option
A	Amount to be raised by the Offering	\$15,001,650	\$17,001,650
B	Selling commissions and fees	\$900,099	\$1,020,099
C	Estimated costs of Offering (e.g., legal, accounting, audit)	\$285,000	\$335,000
D	Net proceeds of Offering: D = A – (B+C)	\$13,816,551	\$15,646,551
E	Working capital as at most recent month end	\$9,000,000	\$9,000,000
F	Additional sources of funding	Nil	Nil
G	Total available funds: G = D+E+F	\$22,816,551	\$24,646,551

How will we use the available funds?

Description of intended use of available funds listed in order of priority	Assuming no exercise of the Option	Assuming full exercise of the Option
Drilling and exploration at the Munro-Croesus Project	\$17,000,000	\$17,000,000
General and Administrative	\$2,000,000	\$2,000,000
Unallocated Working Capital	\$3,816,551	\$5,646,551
Total	\$22,816,551	\$24,646,551

The above noted allocation of capital and anticipated timing represents the Company's current intentions based upon its present plans and business condition, which could change in the future as its plans and business conditions evolve. Although the Company intends to spend the proceeds from the Offering as set forth above, there may be circumstances where, for sound business reasons, a reallocation of funds may be deemed prudent or necessary and may vary materially from that set forth above, as the amounts actually allocated and spent will depend on a number of factors, including the Company's ability to execute on its business plan. See the "Cautionary Statement Regarding Forward-Looking Information" section above.

The most recent interim financial report of the Company included a going-concern note. The Company is still in the exploration stage and the Company has not yet generated positive cash flows from its operating activities, which may cast doubt on the Company's ability to continue as a going concern. The Offering is intended to permit the Company to carry out its work programs at the Munro-Croesus Project and is not expected to affect the decision to include a going-concern note in the next annual financial statements of the Company.
